

## ***Zacks Earnings Trends***

Sheraz Mian

SMian@Zacks.com

### **What will the Q3 Earnings Season Show?**

#### **Here are the key points:**

- For 2025 Q3, total S&P 500 index earnings are expected to be up +5.2% from the same period last year on +6.0% higher revenues.
- Unlike other recent periods, the revisions trend has been positive, with estimates for Q3 modestly up since the quarter got underway. Since the start of July, earnings estimates have increased for 5 of the 16 Zacks sectors, including Tech, Finance, and Energy. A similar trend has been at play for Q4 as well.
- Q3 earnings estimates have been under pressure for 11 of the 16 Zacks sectors since the start of the period, with the biggest pressure at the Medical, Transportation, Basic Materials, Consumer Discretionary, Consumer Staples, Construction, and Industrial Products sectors.
- The positive revisions trend makes the overall setup for the Q3 earnings season favorable, but it raises the odds of actual results coming up short of expectations. In other words, it is reasonable to worry whether expectations for the period are too high, particularly for the Tech and Finance sectors.
- With respect to growth, Q3 earnings are expected to be above the year-earlier level for 6 of the 16 Zacks sectors, including the Aerospace (up +248.9%), Tech (+11.9%), and Finance (+9.7%) sectors.
- Q3 earnings are expected to be below the year-earlier level for 10 of the 16 Zacks sectors, including the Autos (down -32.0%), Construction (-14.3%), and Transportation (-7.7%) sectors.
- Excluding the Tech sector contribution, Q3 earnings for the rest of the S&P 500 index would be up only +2.2% (vs. +5.2% otherwise).
- For the Magnificent 7 group, Q3 earnings are expected to be up +12.1% from the same period last year on +14.6% higher revenues, which would follow the group's +26.4% earnings growth on +15.5% revenue growth in the preceding period.

- Q3 earnings for the S&P 500 index would be up only +3.2% from the same period last year if the Mag 7 group's substantial earnings contribution is excluded (vs. +5.2% otherwise).

For the 10 S&P 500 members that have recently reported quarterly results for their fiscal quarters ending in August (part of the Q3 tally), total earnings are up +17.1% from the same period last year on +8.1% higher revenue, with 60% beating EPS estimates and 80% revenue estimates.

- As with Q3 estimates, estimates for 2025 Q4 have also nudged up in recent weeks. Since the start of July, Q4 earnings estimates have increased for 7 of the 16 Zacks sectors, including Tech, Finance, Retail, Utilities, and Energy sectors. Sectors whose Q4 estimates remain notably under pressure include Consumer Discretionary, Medical, Autos, Construction, and Basic Materials.
- Looking at the calendar year picture, total S&P 500 earnings are expected to grow by +9.4% in 2025, with the growth pace improving to +10.4% when the Energy sector drag is excluded. A total of 10 sectors are expected to produce positive earnings growth in 2025, with double-digit earnings growth from the Aerospace (+57.2%), Consumer Discretionary (+21.1%), Medical (+11.3%), and Tech (+15.4%) sectors.
- For the Mag 7 group, total 2025 earnings are expected to increase by +17.6% on +10.5% higher revenues. Excluding the Mag 7 contribution, total earnings for the remaining S&P 500 companies are expected to grow +6.9% in 2025, which compares to +4.1% growth in 2024 and -4.8% in 2023.
- The implied 'EPS' for the S&P 500 index, calculated using the current 2025 P/E of 25.8X and index close, as of September 23rd, is \$257.99. Using the same Q3 methodology, the index 'EPS' works out to \$290.60 in 2026 (P/E of 22.9X). The multiples have been calculated using the index's total market cap and aggregate bottom-up earnings for each year.
- Using the same methodology of market cap and aggregate bottom-up earnings estimates, the index P/E works out to 22.6X for 2025 on an ex-Mag 7 basis. The Mag 7 companies are currently expected to bring in 25% of total S&P 500 earnings in 2025 and account for 34.4% of the index's total market capitalization.

### **Are Q3 Earnings Expectations Too High?**

As we have consistently highlighted in recent weeks, the overall revisions trend remains positive, with estimates for the back half of the year steadily going up.

For 2025 Q3, the expectation is for earnings growth of +5.2% on +6.0% revenue gains. We have consistently shown in this space how Q3 estimates have steadily increased since the quarter began.

A comparable trend has been at play with respect to estimates for the last quarter of the year, when S&P 500 earnings are expected to increase by +7.1% on +6.7% higher revenues. The chart below shows how Q4 estimates have evolved over the last couple of months.

Some of the same sectors that have been enjoying a favorable revisions trend for Q3 are in play for Q4 as well, particularly the Tech, Finance, and Energy sectors.

JPMorgan (JPM) and Wells Fargo (WFC) will kick off the Q3 earnings season for the Finance sector on October 14<sup>th</sup>. While Q3 estimates for Wells Fargo have barely moved higher, those for JPMorgan have clearly increased lately. A comparable trend is at play for JPMorgan and Wells Fargo for 2025 Q4 as well.

### **The Earnings Big Picture**

The chart below shows expectations for 2025 Q3 in terms of what was achieved in the preceding four periods and what is currently expected for the next three quarters.

The chart below shows the overall earnings picture for the S&P 500 index on an annual basis.

The aforementioned favorable revisions trend validates the market's rebound from the April lows. It will be interesting to see if this positive revisions trend will remain in place, as we get into the Q3 reporting cycle.

The robust recent results from Oracle and Micron suggest that the trend can continue. But we have to keep in mind that the profitability strength from these Tech players primarily reflects developments in the artificial intelligence space that were already being credited for the Mag 7 group's prominence. It remains to be seen whether the favorable trend will be reflected in non-tech areas of the economy.

## The Report in Detail

*Note: This report has six sections. The first section, titled Q3 Earnings Season Scorecard, provides a real-time update of the earnings season, puts the results thus far in a historical context, and highlights the major sectors. The second section, titled the Blended Picture, presents the composite or blended Q3 expectations by combining the actual results that have come out with estimates for the still-to-come companies. The Third section, titled the Context, puts the blended Q3 expectations in the context of what was reported in the preceding quarters and what is expected in the coming quarter(s). This section provides both earnings and revenues on a quarterly basis, both the dollar amounts as well as the year-over-year growth rates. The fourth section, titled Annual Data, presents the earnings and revenues data on an annual basis. The fifth section, titled Small-Cap Earnings, presents the earnings picture for the S&P 600 index. The final section visually presents the market capitalization and earnings contribution of the 16 Zacks sectors.*

### Section 1 – Q3 Earnings Scorecard

The Q3 earnings season will really take the spotlight when JPMorgan, Wells Fargo, and other banks report their September-quarter results on October 14<sup>th</sup>. But recent results from the likes of Oracle, Adobe, FedEx, and others for their fiscal quarters ending in August are also counted as part of the overall Q3 tally. Thus far, we have seen such fiscal August-quarter results from 10 S&P 500 members.

Total Q3 earnings for the 10 S&P 500 members that have reported so far are up +17.1% from the same period last year on +8.2% higher revenues, with 60.0% companies beating EPS estimates and 80.0% beating revenue estimates.

The comparison charts below show the Q3 earnings and revenue growth rates in a historical context.

The comparison charts below show the Q3 EPS and revenue beats percentages in a historical context.

## Section 2 – The Blended Picture

Total Q3 earnings, or aggregate net income for the S&P 500 index, are expected to be up +5.2% from the same period last year on +6.0% higher revenues. The summary table below shows the blended or composite Q3 expectations and the actuals for the preceding period (2025 Q2).

S&P 500 Blended Summary Picture						
Zacks Sectors	Year-over-Year Growth					
	Earnings		Revenues		Margins	
	3Q25	2Q25	3Q25E	2Q25	3Q25E	2Q25

Source: Zacks Investment Research, Inc.

Data as of: 9/24/25 www.zacks.com

Ten of the 16 Zacks sectors are expected to earn less in 2025 Q3 relative to the year-earlier period. These include Cons. Staples (-6.2%), Cons. Discretionary (-6.8%), Medical (-0.1%), Autos (-32.0%), Industrial Products (-1.8%), Construction (-14.3%), Conglomerates (-2.1%), Transportation (-7.7%), and Energy (-4.0%).

On the positive side, six of the 16 Zacks sectors are projected to post positive growth, including Basic Materials (+2.7%), Retail (+4.7%), Technology (+11.9%), Aerospace (+248.9%), Finance (+9.7%), and Business Services (+4.5%).

The chart below shows the absolute quarterly dollar total estimate for 2025 Q3 for the index as a whole in the context of what was actually achieved in the last eight periods and what is expected in the following three quarters.

As you can see above, the quarterly earnings tally is expected to be a hair above the all-time quarterly record established in the preceding period (2025 Q2).

Total **Tech sector** earnings are expected to grow +11.9% in Q3 on +12.6% higher revenues, which follows earnings growth of +21.8% on +14.3% higher revenues in the preceding quarter (2025 Q2). The Tech sector's growth pace is expected to continue, as shown below.

### **The Magnificent 7**

For the 'Mag 7' companies - Microsoft, Alphabet, Meta, Apple, Tesla, Nvidia, and Amazon - total Q3 earnings are expected to be up +12.1% on +14.6% higher revenues. This follows the group's +26.4% earnings growth in Q2 on +15.5% higher revenues, as the chart below shows.

The chart below shows the group's earnings picture on an annual basis.

Estimates for aggregate 2025 Mag 7 earnings peaked in mid-March and had been on a steady downtrend, but started going back up from May onwards, as the chart below shows. Please note that we have rounded up/down the numbers, so that the image looks less 'busy'.

The charts below show the dollar-level Mag 7 earnings and revenues, estimates for the current year and the next two, and actuals for the preceding six years.

The Mag 7 stocks accounted for 24.1% of all S&P 500 earnings in 2025 Q2, with the proportion expected to increase to 24.6% in 2025 Q3. The chart below shows the group's earnings contribution on an annual basis.

As you can see above, these 7 mega-cap companies combined accounted for 23.2% of all S&P 500 earnings in 2024, up from 18.3% in 2023 and 11.7% in 2019. The Mag 7 is expected to bring in 25.0% of total index earnings in 2025, but the rest of the 493 index members also start pitching in.

In fact, S&P 500 earnings in 2025 will grow at a +6.9% pace, up from 2024's +4.1% pace, even if the substantial contribution from the Mag 7 group is excluded, as the chart below shows.

Q3 earnings for the **Construction sector** are expected to decline -14.3% from the same period last year on +0.3% higher revenues. This would be the third quarter in a row of double-digit earnings decline for the sector, which has been hit hard by elevated interest rates and the Trump administration's restrictive immigration policy.

The Construction sector is the second smallest Zacks sector in the S&P 500 index (Conglomerates is the smallest), accounting for 1% of the index's market capitalization and expected to bring in 1.1% of the index's total earnings for the coming four-quarter period. The sector's earnings are expected to decline -14.8% in 2025, which would follow +6% growth in 2024 and a -4.6% decline in 2023.

Construction sector earnings are projected to grow by 10.9% in 2026 and 13.2% in 2027, indicating a return to positive growth.

The chart below shows the annual aggregate earnings totals for the sector. Please note that we have rounded the totals for the preceding periods.

As you can see above, the 2025 total is on track to be the lowest in the last four years.

### Section Three - The Context

Let's compare earnings expectations for 2025 Q3 to what companies earned in the last few quarters and what they are expected to earn in the coming quarters.

**Table 2 – Earnings Growth Context**

Zacks Sectors	Earnings Growth (YoY)								
	2Q26E	1Q26E	4Q25E	3Q25	2Q25	1Q25	4Q24	3Q24	2Q24

www.zacks.com

It may be obvious, but it's still useful to explain what we mean by total earnings.

This means the sum of net income for all companies in the S&P 500. For historical periods through the reported 2025 Q3 results, we have taken the total earnings (net income, not EPS) for each company in the S&P 500 and added them up to arrive at the sector and index level totals (we do adjust reported GAAP earnings for non-recurring items, but consider employee stock options as a legitimate business expense).

For the coming quarters, including the still-to-come 2025 Q3 results, we have taken the Zacks Consensus EPS for each company in the index, multiplied that by the corresponding share count (from the last reported quarter) to arrive at the total earnings for each company. And then we aggregated them to arrive at the totals for each sector and the index as a whole. The lack of accuracy in real-time share count notwithstanding, this gives us a fairly accurate view of the total earnings picture.

## Section 4 - Annual Earnings

Total earnings or aggregate net income for the S&P 500 index for 2025 are expected to be up +9.4%, with 2026 earnings expected to be up +12.6%. Earnings growth for 2025 improves to +10.4% on an ex-Energy basis.

## The Margins Picture

Net margins (aggregate net income divided by aggregate revenues) are expected to be 12.9% in Q3, down from 13.2% in the preceding period and 13.0% in the year-earlier level. The chart below shows the year-over-year changes in net margins.

Looking at net margins on an annual basis, full-year 2025 margins are expected to reach 13.1%, up from 2024's 12.2% and 2023's 11.6%. The expectation is for margins to rise next year to 13.8%.

The charts below show current margins expectations in a historical context. The first chart shows margins on a quarterly basis, while the second shows annual margins since 2007.

As you can see in the annual chart, margins reached their cyclical high point in 2018 due to the tax cut legislation but modestly contracted the following year (2019) and pulled back massively in 2020 due to the pandemic. Margins bounced back impressively in 2021, reaching a new all-time record.

The expectation is that the ongoing inflationary pressures ease over time, with margins expanding in 2025.

A significant portion of the margin gains this year is coming from the Tech sector, as the chart below illustrates.

The Tech sector's favorable margin outlook reflects the ever-rising share of space's profitability from the higher-margin software and services side. Current optimism about the coming AI boom is likely a big contributor to expectations for next year and beyond. The emerging tariff regime is expected to become a new headwind for the margins outlook, even if only part of the incrementally higher expense is passed on to end consumers. It is still too early to precisely model the earnings and margins impact of these macroeconomic developments, but there is little doubt that the net effect will be negative.

## Section 5 - The Small-Cap Data – S&P 600 Index

For the S&P 600 index as a whole, 2025 Q3 earnings are expected to be up +19.4% from the same period last year on +3.1% higher revenues, as the summary table below shows.

Zacks Sectors	Year-over-Year Growth - S&P 600

Data as of: September 24, 2025

The chart below shows the small-cap index's annual earnings and revenue growth.

The chart below represents the small-cap index's total earnings instead of the growth rates, showing the impact of the pandemic on earnings.

## Section 6: Market Cap vs. Total Earnings

The charts below show the share of total forward 12-month earnings (next four quarters) as well as the share of total market capitalization for each of the 16 Zacks sectors in the S&P 500 index. Since the S&P 500 is a market-cap-weighted index, each sector's market cap share is also its index weight.

The Finance and Technology sectors account for the lion's share of the index's total market capitalization and also contribute a large proportion of its total earnings. Technology is by far the biggest earnings contributor, as you can see in the charts below.

Relative market cap weights in the small-cap S&P 600 index are totally different from the large-cap index. The Finance sector is a much bigger part of the small-cap index, while the Tech sector is a significantly smaller part.
